

vehicles, the apparatus further comprising solar panels which are operatively connected to said motors for providing energy to said motors.

Claim 82. A system for demarcating an area within a field to limit the freedom of movement of animals which comprises: the plurality of vehicles; each of said vehicles connected to an electrified wire which, at least in part, defines said area; each of said vehicles having motive means for moving said vehicle and a power source for energizing said motive means, each of said vehicles having two ground engaging members for moving and steering it which are rotated by said motive means; a computer that controls each of said vehicles, at least one of said vehicles having a reel upon which said a wire can be wound and unwound and which tightens said wire; and each of said vehicles having location determining means via a geodetic positioning system which cooperates with said computer for determining the position of each of said vehicles relative to said field, said computer being programmed so that said vehicles are controlled by said computer and move to predetermined locations at predetermined points of time according to a predetermine pattern.

Claim 83. A system in accordance with Claim 82 wherein said grounding engaging members comprise wheels which rotate about a respective axis of rotation, the center of gravity of each of said vehicles being below its respective axis of rotation.

Claim 84. A system in accordance with Claim 82 wherein in said power source comprises for each said vehicles a battery and a solar panel for charging said battery carried by each said vehicle.

### REMARKS

This Supplemental Amendment is in supplement to the Amendment filed February 27, 2003.

In reviewing that Amendment, it was noted that there was a minor clerical error in claim 80 and therefore new claim 81 is the same as claim 80 wherein this clerical error has been corrected.
